Additional comments: [More time needed for each session in the future](#)

Too much comment from the chairperson

First session was very long

Really good event - well done. Different to the norm with very relevant topical sessions and debate rather than the same old topics year after year

6. What overall themes or areas of discussion would you find useful in future events?

“Other” answers: When there are non specialists in the house you need to attract. Keep it simple and use more time/start earlier

7. Will you attend the next GSL Summit?

“Other” answers: depends on date, topics, location agenda etc,
depends on my agenda

8. What other participants or attendees would you like to see more of at future events?

“Other” answers: analysts and fund managers,
 was OK,
 more local banks,
 it was ok as it was,
 compliance and risk people - they need to understand what the product is!

9. Please provide a testimonial stating how you found the summit:

A very to the point summit. Not too long and enough time, before and after, for networking. Excellent formula.

Good representation of the industry; practical and interesting overview of current developments

GSL Summit brought together the Dutch securities finance industry to discuss the relevant developments in the marketplace. A nice extra conference after the big one in June

This summit has proven that beneficial owners are willing to engage in topics that once seemed "risk-free". It is important to understand the impact on their programmes and how we as a market can adapt and evolve.

I found it very useful to hear insiders sharing their thoughts. I thought the setting was really open.

Good summit

Found it interesting. I was missing the current hot topic called CCP services and how to embed it in the market.

This is a good kick off - Hope it triggers questions for participants to get more beneficial owners active. A lot of work to do. Takes quite some time to implement. It starts with a portfolio manager who has interest. But top lever manager needs to understand and give green light. How do you reach these guys.....
